

Organisation plan for classroom in Novaschool centres

- The distribution of the tables will be in accordance with the rules of social distancing that are governed by the authorities. Novaschool includes new outdoor classes with the objective that in the classrooms that the safety distance of 1.5 metres cannot be maintained the new outdoor classrooms can be used, therefore the need for wearing masks throughout the day will not be necessary. This new way of learning will give greater convenience and comfort to students and teachers, giving a space of freedom during the daily school day. Thus, we will ensure the intercalation of outdoor classes with indoor classes.
- Students will use the same table and chair every day. The table and chairs will be labelled with the corresponding student's name. In the case of multipurpose classrooms, tables and chairs will be cleaned after each use.
- Groups will be organised by size and depending on the number of students, the groups with the largest volume will occupy the classrooms with the largest size.
- Classes with less space will be adapted, relocating the whiteboards and eliminating lockers or bulky elements that can generate greater space in the classrooms.
