

Organisation plan and protection and prevention measures on school transport

The school transport service will ensure compliance with safety measures required by the regulations in force at the time. We understand and use as a starting point the general measures adopted in public transport during this new normality phase, allowing the occupation of all places, we contemplate some of the measures that we will initially establish:

- The temperature will be taken before entering the bus
- Washing hands with hydroalcoholic gel before boarding the bus.
- Orderly entering and exiting of the vehicle, lining up and maintaining the safe distance.
- Maximum separation will be sought in the case of students belonging to a different group - class of coexistence.
- Mandatory use of hygienic masks for all people traveling on the bus. The students must wear their masks.
- Students will sit in their designated place every day.
- Students to wash hands when exiting the vehicle with alcoholic gel and before entering the school.
